

# Firewall settings for hosted telephony

## Firewall settings

In the firewall, all SIP-ALG/SIP-inspection must be disabled. Also make sure, that no other SIP/VoIP features are enabled.

### Outgoing <sup>1</sup>

From	Port	Protocol	Service
94.127.49.0/24	80	TCP	HTTP
94.127.49.54	123	TCP/UDP	NTP
94.127.49.55			
94.127.49.0/24	443	TCP	HTTPS
94.127.49.224/28	9443	TCP	HTTPS
94.127.49.224/28	5060	TCP/UDP	SIP/SIP TLS
94.127.49.224/28	5061	TCP/UDP	SIP/SIP TLS
94.127.49.224/28	49152-65535	UDP	SIP/RTCP

### Incoming <sup>2</sup>

From	Port	Protocol	Service
94.127.49.224/28	5060	TCP/UDP	SIP/SIP TLS
94.127.49.224/28	5061	TCP/UDP	SIP/SIP TLS
94.127.49.224/28	49152-65535	UDP	RTP/RTCP

<sup>1</sup> All traffic is initiated from inside out.

<sup>2</sup> Only relevant if the firewall is thoroughly closed.
